FROM: Adam Pugh  
Office of Asset Management (MA-50)  
SUBJECT: Condition Assessment Information System (CAIS) Version 3.1.1 Release

Today, Thursday, December 17, 2015, version 3.1.1 of the Condition Assessment Information System (CAIS) was released. The URL to access the CAIS application is <https://cais.doe.gov>. This release addresses the following enhancements which will automatically be available when you log into CAIS from your browser.

- The Site Data window under Site Information has been modified to include the capability to customize the Project **Funding Type** and **Funding Source** data elements from the Projects module.
- A new security level of Site Read Only has been added to CAIS. This will be used for individuals who only require read-only access to one specific site within a Field Office.
- The Inspector ID field label has been renamed to Inspector Name. The **Inspector Name** includes both the first and last names which are required. For some sites, the first name was blank, so a value of "first name" was inserted into this field which indicates an update is needed.
- Data entry screens have been enhanced to provide a more clear designation when viewing archived data.
- The ability to delete Saved Types is now available from the Saved Types window.
- The CAIS User's Guide has been updated to reflect these enhancements. This document can be obtained from the CAIS Informational website (<https://cais.doe.gov/caisinfo/sofdoc.htm>).

If you have any questions related to these enhancements, please contact Mark Gordy ([mark.gordy@hq.doe.gov](mailto:mark.gordy@hq.doe.gov)) or Gayle Smith ([gayle.smith@hq.doe.gov](mailto:gayle.smith@hq.doe.gov)).
